¹ Percentages are based on victims receiving services for whom this information was known.

² Some victims may identify with more than one race/ethnicity, so the total number reported in race/ethnicity may be higher than the total number of victims served.

³ Because victims may be represented in more than one of these categories, or not at all, the total for this category may be higher or lower than the total number of victims served.

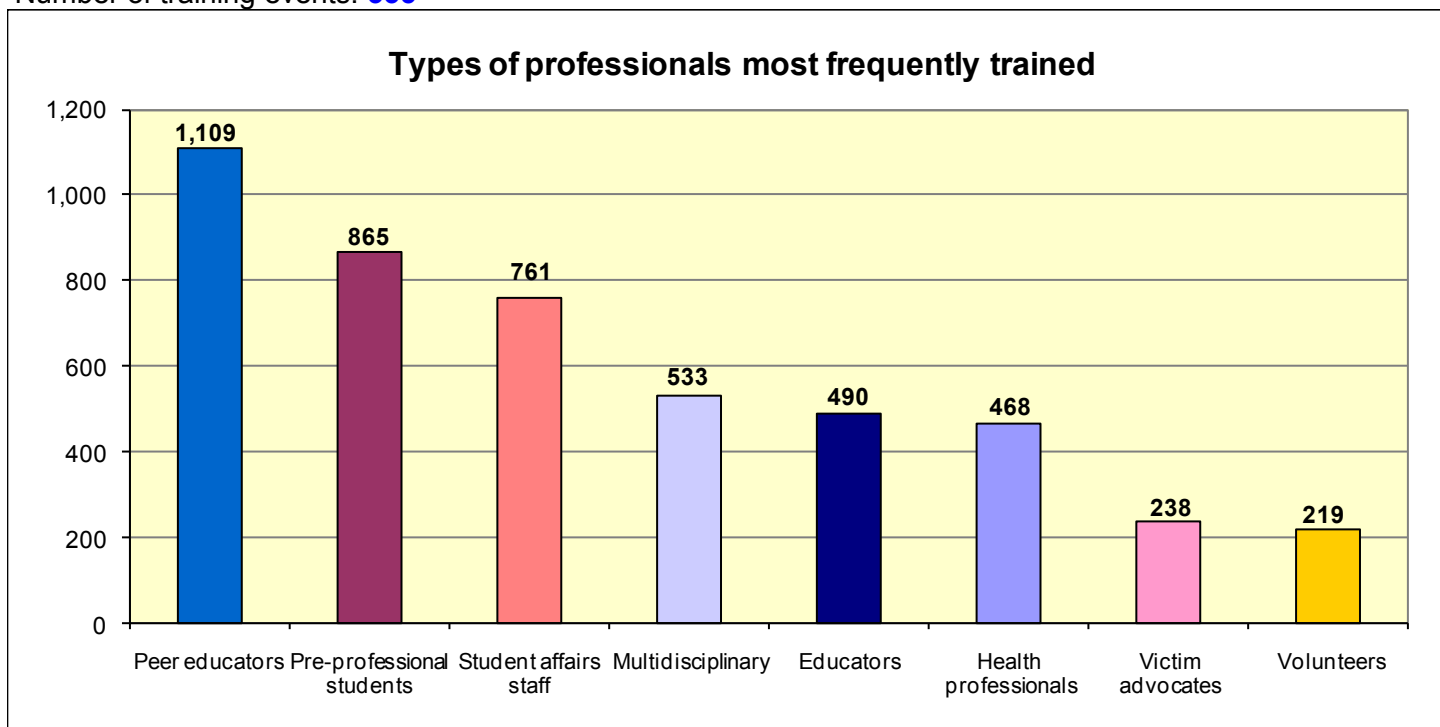

⁴ Victims may have been abused by more than one offender and/or may have experienced more than one type of victimization, so the total for each victimization category (when unknowns are included) may be higher than the total number of victims served in each of those categories. Percentages presented here are based on the total number of known relationships in each victimization category.
