⁵ Because victims/survivors may be represented in more than one of these categories, or not at all, the total reported for this category may be higher or lower than the total number of victims/survivors served.

⁶ Victims/survivors may have been abused by more than one offender and/or may have experienced more than one type of victimization, so the total for each victimization category may be higher than the total number of victims/survivors served in each of these categories.
