Grants to Enhance Culturally Specific Services for Victims of Domestic Violence, Dating Violence, Sexual Assault, and Stalking Program

The Grants to Enhance Culturally Specific Services for Victims of Sexual Assault, Domestic Violence, Dating Violence, and Stalking (Culturally Specific Services Program or CSSP) creates a unique opportunity for culturally specific community-based organizations to address the critical needs of victims of domestic/sexual violence in a manner that affirms a victim’s culture and effectively addresses language and communication barriers.

Grantees may either be a culturally specific community-based program with existing expertise in serving victims of domestic/sexual violence, or a culturally specific community-based program that partners with another organization with expertise in serving victims of domestic/sexual violence.

75 Grantees Reporting
Between July 1, 2013 and June 30, 2015, 75 unique grantees reported activities funded by the CSSP Program.

3,445 Victims Served
On average, grantees served 3,445 victims during each 6-month reporting period.

376 Immigration Matters
On average, grantees provided assistance with immigration matters to 376 victims during each 6-month reporting period.

Latina and African American women who are sexually assaulted may bear an additional burden in seeking support, as they are disproportionately affected by income and asset poverty, and may have limited access to legal, medical, and social support services that may aid in violence prevention and recovery.418
CSSP enhances the safety of victims and their children by supporting community-based culturally specific projects to address and prevent domestic/sexual violence. Purpose areas include:

- Increase communities’ capacity to provide culturally specific resources and support for victims and their families;
- Enhance traditional services to victims through the leadership of culturally specific programs offering services to victims of domestic/sexual violence;
- Work in cooperation with the community to develop education and prevention strategies highlighting culturally specific issues and resources regarding victims of domestic/sexual violence;
- Provide culturally specific resources and services that address the safety, economic, housing, and workplace needs of victims, including emergency assistance;
- Provide culturally specific programs for children exposed to domestic/sexual violence;
- Work with state and local governments and social service agencies to develop and enhance effective strategies to provide culturally specific services to victims;
- Strengthen criminal justice interventions, by providing training for law enforcement, prosecution, courts, probation, and correctional facilities on culturally specific responses to domestic/sexual violence; and
- Examine the dynamics of culture and its impact on victimization and healing.

VAWA 2013 clarified that victim services and legal assistance include services and assistance to victims of domestic/sexual violence who are also victims of severe forms of trafficking in persons. VAWA 2013 also modified the focus of CSSP by redefining “culturally specific” to mean primarily directed toward racial and ethnic minority groups as defined in section 1707(g) of the Public Health Service Act (“American Indians [including Alaska Natives, Eskimos, and Aleuts]; Asian Americans; Native Hawaiians and other Pacific Islanders; Blacks; and Hispanics”). As of FY 2014, Underserved Program now focuses on services for Deaf or hard of hearing victims, LGBT victims, and victims from underserved religious/ethnic backgrounds.
General Grant Information

Information for this report was submitted by 75 individual grantees for the July 1, 2013 to June 30, 2015 progress reporting period.

- 6 (8%) grantees reported that their grants specifically addressed tribal populations.
- Grantees most frequently addressed the following purpose areas:
  - Enhanced traditional services to victims through the leadership of culturally specific programs offering services to victims of domestic/sexual violence;
  - Increased communities’ capacity to provide culturally specific resources and support for victims and their families; and
  - Worked in cooperation with the community to develop education and prevention strategies.

Staff

Grant-funded staff provide victim services, training, outreach, advocacy, counseling, court and medical accompaniment, and community education to increase victim safety and offender accountability. **Being able to hire staff is critical to the overall function and success of programs.**

- 75 (100%) grantees used funds for staffing needs.
- Grantees funded an average of 95 full-time equivalent (FTE) staff during each 6-month period.
- Grantees most often used these staffing funds to support victim advocates and program coordinators.
IL - Grantee Perspective

Thanks to the CSSP grant funding, Apna Ghar has been able to hire a veteran Education and Training Coordinator with 25 years of community education and violence prevention experience. The Education and Training Coordinator served on Apna Ghar’s Board soon after it was established, and she joined the staff as a Community Educator and Legal Advocate in 1992-1995. She is able to provide a longitudinal perspective on critical changes in options for abused immigrant women (VAWA, T visa, etc.) that advocates have won since the early 1990s, while observing the ongoing systemic barriers, such as language access, to receiving equal and basic services from the police and courts. She has engaged her broad network of contacts and her experience in training design to develop templates for trainings that are accessible to professionals in the criminal justice, social service, and healthcare systems.

APNA GHAR, INC. (OUR HOME), ILLINOIS

WA - Grantee Perspective

During this reporting period, we provided three trainings to over 56 providers. We provided training on best practices in serving LGBT victims of sexual violence to military sexual assault advocates; the first training of its kind offered to military personnel from military bases and installations across the Pacific Northwest. We also offered training on inclusive, culturally responsive service provision to LGBT victims of intimate partner violence. One session was offered as a pre-conference institute at the National Conference on Health and Domestic Violence, drawing a large, interdisciplinary crowd of DV advocates, medical and mental health professionals, government officials, state coalition staff, and many others.

THE NW NETWORK OF BI, TRANS, LESBIAN & GAY SURVIVORS OF ABUSE, WASHINGTON

---

### Training

Grantees train victim advocates, law enforcement officers, prosecutors, court personnel, probation officers, child protection staff, mental health and other professionals how to develop an effective coordinated community response to violence. **This training improves the professional response to victims and increases offender accountability.**

- 62 (83%) grantees used funds for training.
- Grantees convened a total of 831 training events.
- Grantees trained a total of 15,889 people.
- Most often these trainings reached victim advocates (14%), multidisciplinary staff at the same training (10%), culturally specific staff (9%), and law enforcement officers (8%).

### Community Education

Grant-funded staff provide general information to the community, highlighting culturally specific issues and resources, to increase awareness of domestic/sexual violence. **Community education and outreach activities can be used as a tool to connect people across cultural differences with a common goal of building safe, supportive, and accountable communities, inclusive of all members.**

- 64 (85%) grantees used funds for community education.
- Grantees hosted a total of 2,062 education events.
- Grantees provided education to a total of 67,839 people.

---

¹ Community education involves providing general information that will increase public awareness of sexual assault, domestic violence, dating violence, and stalking. Community education is not the same as training. Training involves providing information on sexual assault, domestic violence, dating violence, and stalking that enables a professional to improve his or her response to victims as it relates to their role in the system.

Victim Services

Victims of domestic/sexual violence within diverse cultures experience unique barriers when seeking and utilizing assistance. Culturally competent services for these victims may include providing advocacy and support to those who seek protection orders; accompaniment during medical procedures, such as a sexual assault forensic examination; providing interpretation or translation services; assistance with safety planning; accompaniment to court; shelter and transitional housing assistance; or immigration assistance. These comprehensive support services address a wide variety of needs to help victims become and remain safe from violence.

- 69 (92%) grantees used funds for victim services.
- Grantees provided services to an average of 3,445 victims during each 6-month period.
- 99% of victims who sought services received them during each 6-month period.

During each 6-month period, on average, grantees provided:

- Victim advocacy services to 1,856 victims;
- Counseling services to 1,833 victims;
- Crisis intervention services to 1,388 victims;
- Language services (i.e. interpretation or translation) to 511 victims;
- Civil legal advocacy services to 462 victims;
- Material assistance (e.g. clothing, food, or personal items) to 459 victims; and
- Civil legal assistance services to 320 victims.

NY Grantee Perspective

Prior to receiving the CSSP grant, there was little or no communication between agencies and organizations dealing with DV and SA issues. The grant also allowed us to build strong partnerships with law enforcement and community-based service providers to make sure we can meet all of the needs of the victims: legal, educational, supportive, housing, etc., in a holistic way. Throughout the duration of the grant, we have had a steady and increasing flow of clients who have learned about our DV services through our comprehensive outreach efforts, word of mouth, and a cross-referral relationship with various key partners outlined in this report. We have distributed thousands of informational brochures and maintained a strong presence at all major immigrant-focused events, conferences, and festivals, regionally and throughout New York.

HISPANIC RESOURCE CENTER OF LARCHMONT AND MAMARONECK, NEW YORK
Grantees used 22 specific languages for these activities:
Acholi, Arabic, ASL, Creole, English, French, Gujarati, Hindi, Japanese, Kinyarwanda, Kirundi, Kiswahili, Korean, Lingala, Mai Mai, Nepali, Portuguese, Punjabi, Somali, Spanish, Sudan Arabic, Tamil

Other services:
- Victim-witness notification/victim outreach services were used a total of 6,049 times;
- Grantees received a total of 23,159 hotline calls; and
  - The majority of these calls (64%) came from victims.

During each 6-month period, on average, grantees provided assistance with the following immigration matters:
- U visa services for 163 victims;
- VAWA self-petition services for 84 victims;
- Work authorization services for 79 victims;
- T visa services for 7 victims;
- Cancellation of removal matters for 6 victims; and
- Other immigration matters for 81 victims.

Grantees provide emergency shelter or transitional housing to victims and their family members. Emergency shelter can include nights in safe houses or hotel/motel accommodations.

Victims Seeking Services
Grantees serve victims of domestic/sexual violence. Between July 1, 2013 and June 30, 2015:
- The majority of victims served or partially served were victims of domestic/dating violence (78%).
Victims’ Relationship to Offender

Grantees serve victims of domestic/sexual violence. Between July 1, 2013 and June 30, 2015:

- The majority of victims served or partially served were victimized by a **spouse or intimate partner** (76%).
- The remaining victims were most commonly victimized in the context of a **dating relationship** (10%) or by another **family or household member** (7%).
Reasons Victims Were Not Served or Were Partially Served

During each reporting period, grantees most frequently noted the following barriers as reasons why victims were not served or were only partially served:

- Program reached capacity;
- Program unable to provide service due to limited resources;
- Services were not appropriate for victim;
- Hours of operation;
- Conflict of interest; or
- Transportation.

Demographics of Victims Served and Partially Served

Grantees served or partially served an average of 3,445 victims during each 6-month period. The majority of victims served or partially served were Hispanic or Latina (40%), female (94%), and between the ages of 25 and 59 (80%).

Secondary Victims

Secondary victims are individuals who are indirectly affected by domestic/sexual violence, including children, siblings, spouses or intimate partners, parents, grandparents, other relatives, friends, and neighbors.

- Grantees provided services to an average of 815 secondary victims during each 6-month period.

Remaining Areas of Need

Grantees most frequently cited access to interpretation and translation services for victims as their biggest unmet need. The inability to understand and be understood by law enforcement, service providers, and court personnel can discourage victims from seeking assistance.

Grantees also reported a need for more culturally and linguistically appropriate victim services, especially:

- Mental health services; and
- Legal services.

Several grantees emphasized the need to provide training to law enforcement, first responders, courts, and service providers on culturally sensitive, trauma-informed practices, especially within marginalized communities.
Many grantees felt that more **community education and outreach was needed in the communities in which they worked** in order to:

- Combat cultural taboos against discussions of sexual assault and domestic violence;
- Engage men in discussions about domestic/sexual violence;
- Reach underserved populations, especially youth and elders; and
- Increase awareness of available services.

Finally, grantees often struggled to **help victims meet basic needs**, including:

- Emergency, transitional, and long-term housing;
- Transportation;
- Employment; and
- Child care.

**NJ · Grantee Perspective**

Education remains the single most significant area of remaining need with regard to improving services to victims. From the community's perspective, there is a stigma associated with domestic violence, sexual assault, and stalking, and a large percentage of the community continues to sweep the issues under the proverbial rug, pretending that they do not exist. As mental health professionals, we know all too well that our community is not immune to issues of abuse. Nonetheless, we regularly hear that community leaders, educators, parents, volunteers, camp counselors, etc. are simply unaware of what signs of abuse, assault, and neglect look like. In other situations, parents do not know how to address the topic of sexual abuse with their young children.

**JEWISH FAMILY SERVICE AND CHILDREN’S CENTER, NEW JERSEY**

**CA · Grantee Perspective**

Access means being able to go into a place for assistance and know that you can fully and effectively communicate with people there. For a Deaf individual requesting a sign language interpreter, the request is often responded to with hostility or just denied. The DV/SA service system forces the victim to either read lips, write notes back and forth or use her/his child to interpret. Daunted and exhausted by having to advocate for her/his communication needs every step of the way, too often the victim is re-victimized and will drop any efforts to seek justice. It is just too much work to have what seems to be a basic right - access to communication.

**NORCAL SERVICES FOR DEAF AND HARD OF HEARING, CALIFORNIA**

**OH · Grantee Perspective**

With the continued implementation of the SafeZone program and subsequently having more shelters that are SafeZone members, it is still true that of Ohio's 80+ shelters, only 12 DV shelters have been identified by BRAVO and our MOU partner, the Ohio Domestic Violence Network (the statewide DV coalition), as serving male-identified and transgender victims. There continues to be a lack of understanding that those in LGBT relationships also face domestic violence, battering, and power and control issues.

**BUCKEYE REGION ANTI-VIOLENCE ORGANIZATION, OHIO**
