^{1.} Percentages are based on victims receiving services for whom this information was known.

^{2.} Some victims may identify with more than one race/ethnicity, so the total number reported in race/ethnicity may be higher than the total number of victims served.

^{3.} Victims may have been abused by more than one offender and/or may have experienced more than one type of victimization, so the total for each victimization category (when unknowns are included) may be higher than the total number of victims served in each of those categories. Percentages presented here are based on the total number of known relationships in each victimization category.

^{4.} Categories are rounded to the nearest whole number and only categories with at least one full FTE after rounding are included.
